

Practical No.7

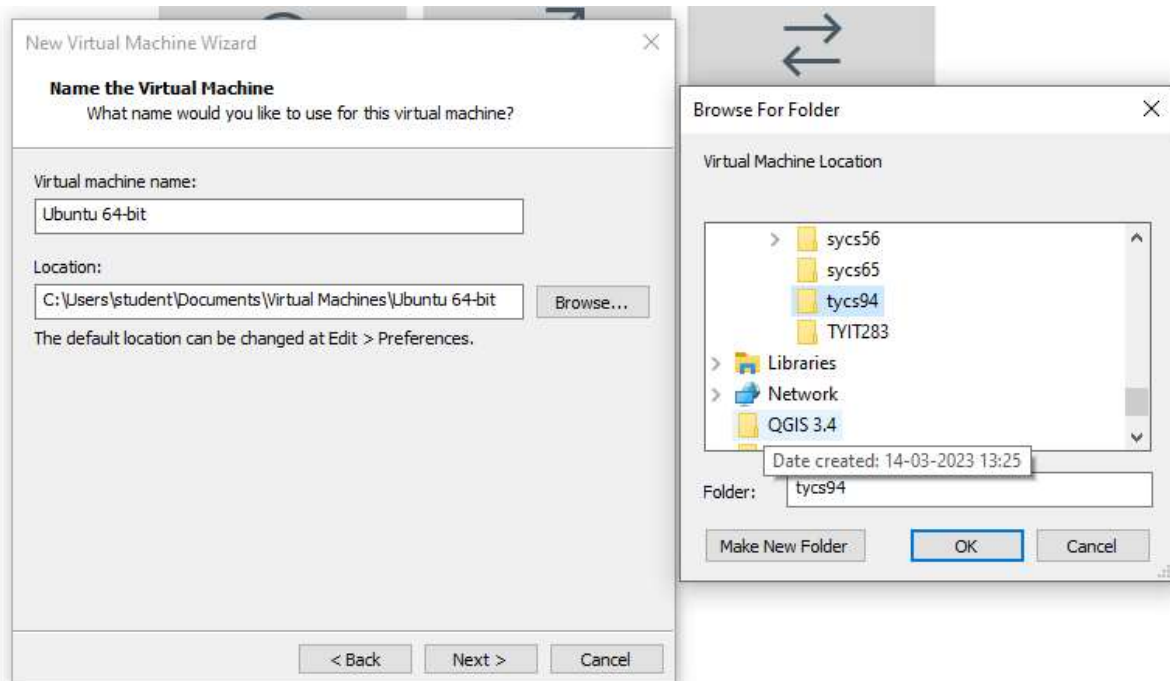

Aim:- Implement FOSS-Cloud Functionality VSI (Virtual Server Infrastructure) Infrastructure as a Service (IaaS), Storage.

Open VMware and follow the below steps:-

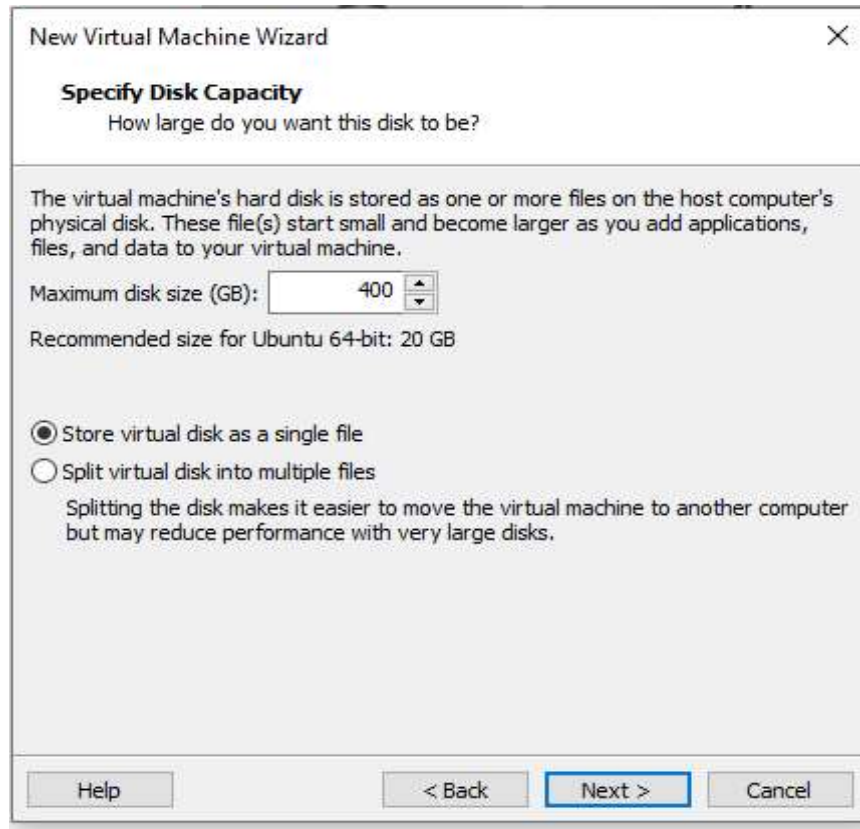

Click on file > New virtual Machine

Give maximum disk size as 400

New Virtual Machine Wizard

Specify Disk Capacity
How large do you want this disk to be?

The virtual machine's hard disk is stored as one or more files on the host computer's physical disk. These file(s) start small and become larger as you add applications, files, and data to your virtual machine.

Maximum disk size (GB):

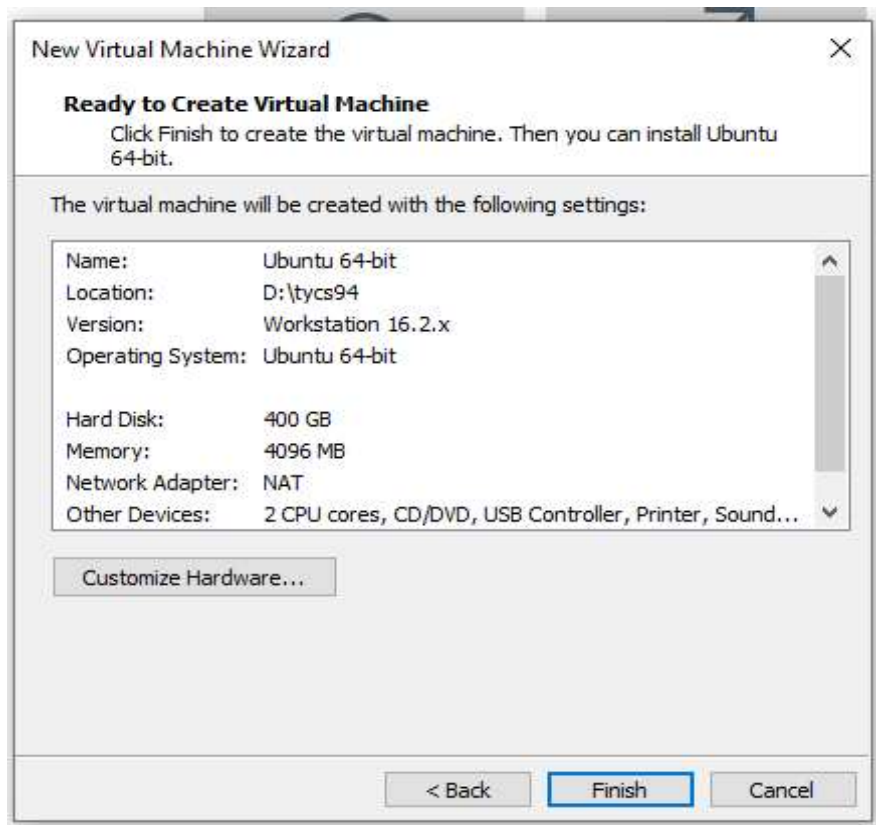

Recommended size for Ubuntu 64-bit: 20 GB

☒ Store virtual disk as a single file
☐ Split virtual disk into multiple files

Splitting the disk makes it easier to move the virtual machine to another computer but may reduce performance with very large disks.

Help < Back **Next >** Cancel

Click on customize hardware

New Virtual Machine Wizard

Ready to Create Virtual Machine
Click Finish to create the virtual machine. Then you can install Ubuntu 64-bit.

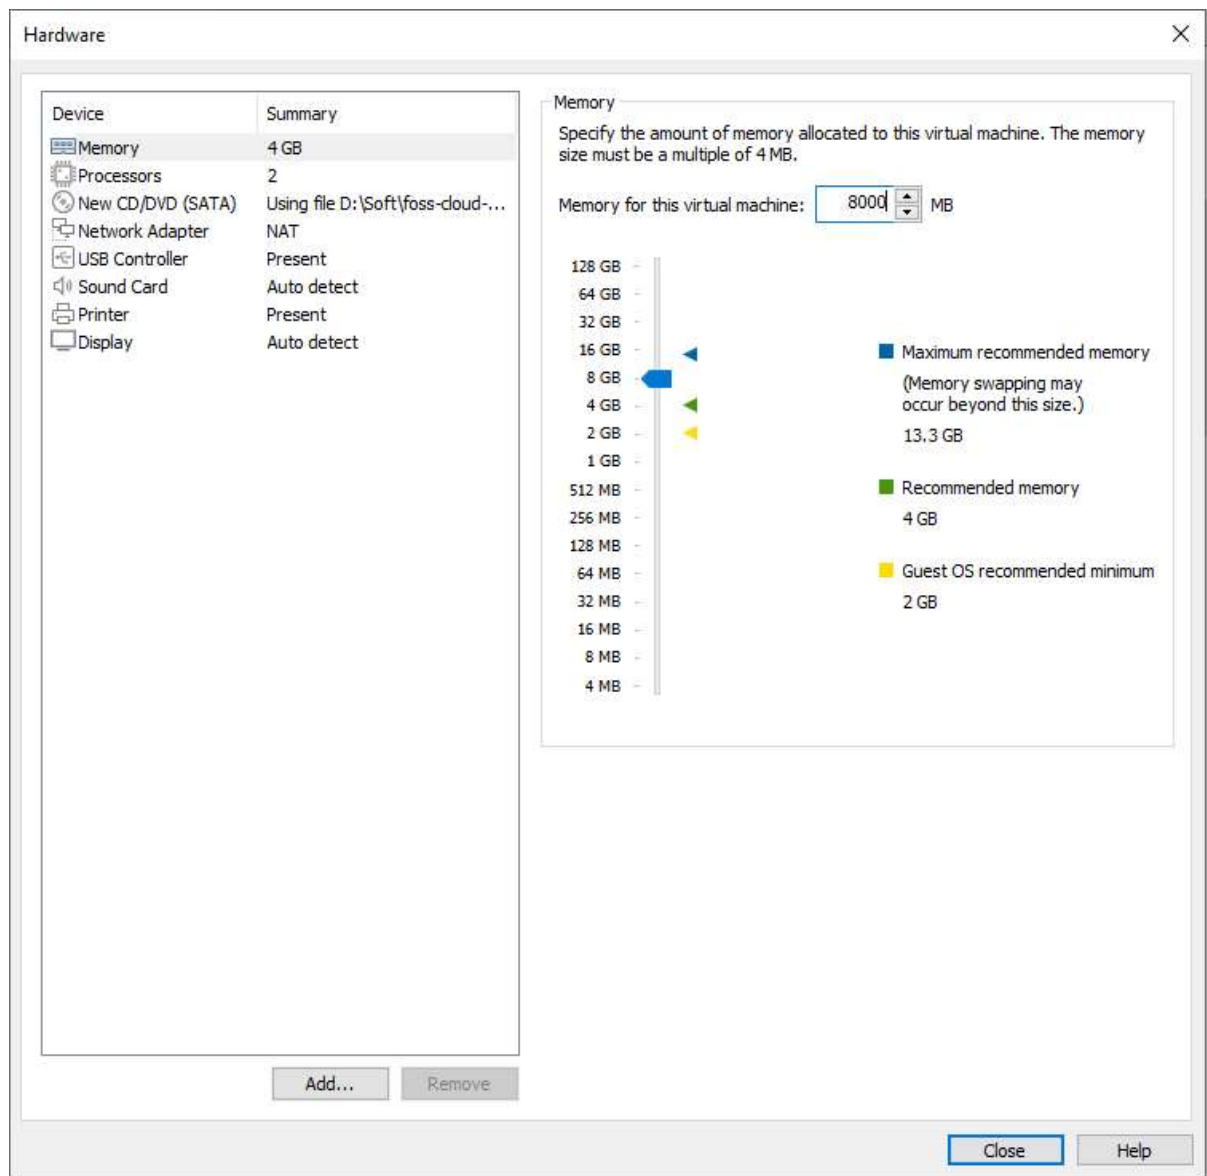

The virtual machine will be created with the following settings:

Name:	Ubuntu 64-bit
Location:	D:\tycs94
Version:	Workstation 16.2.x
Operating System:	Ubuntu 64-bit
Hard Disk:	400 GB
Memory:	4096 MB
Network Adapter:	NAT
Other Devices:	2 CPU cores, CD/DVD, USB Controller, Printer, Sound...

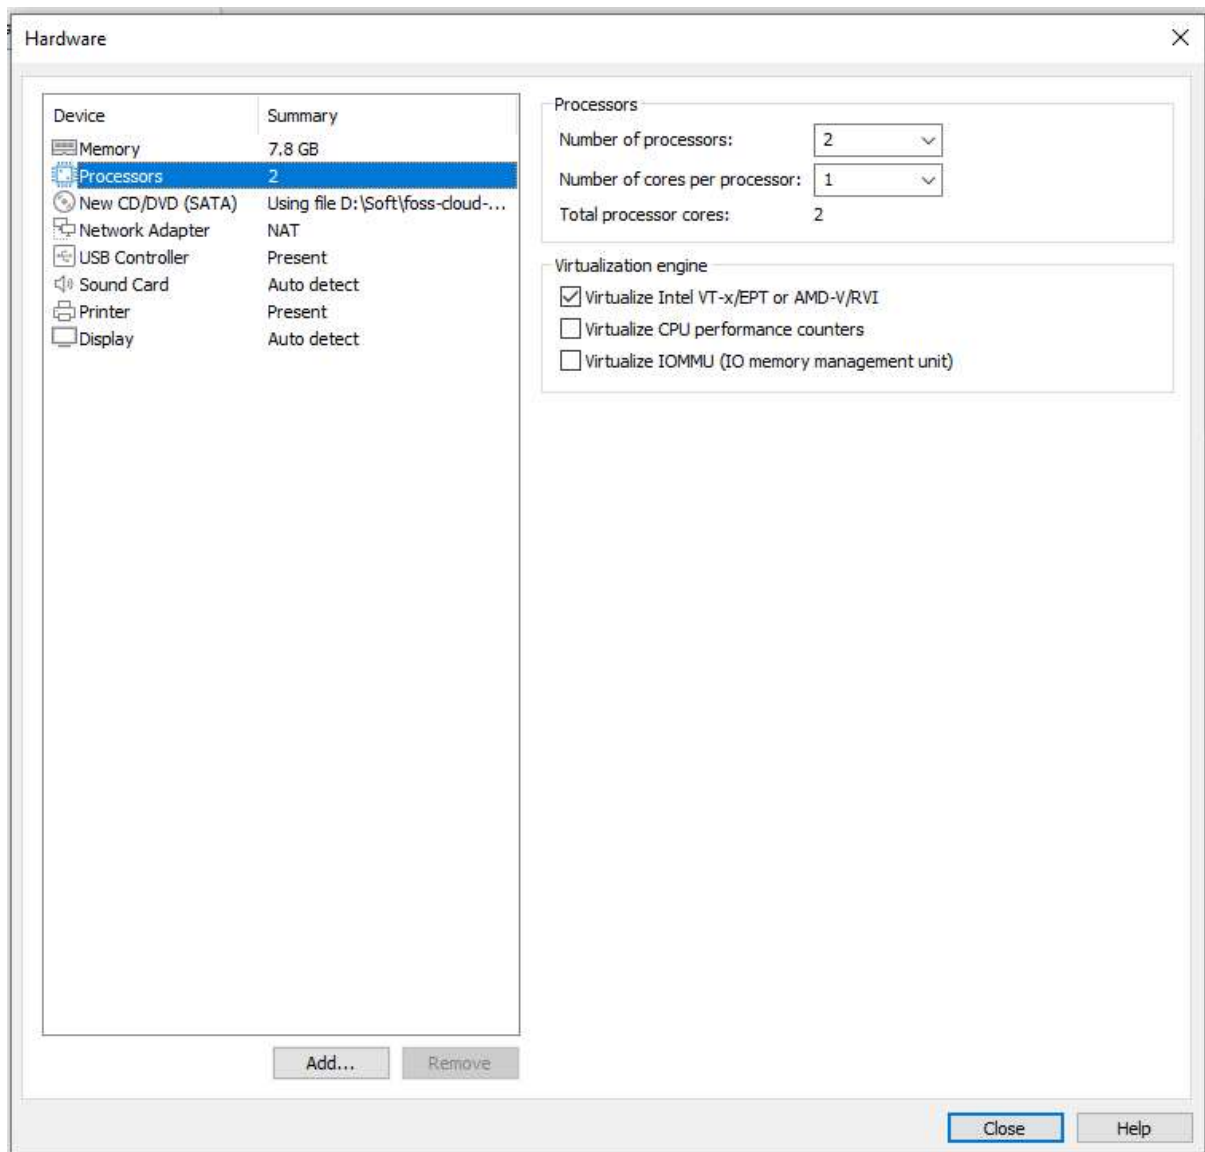

Customize Hardware...

< Back **Finish** Cancel

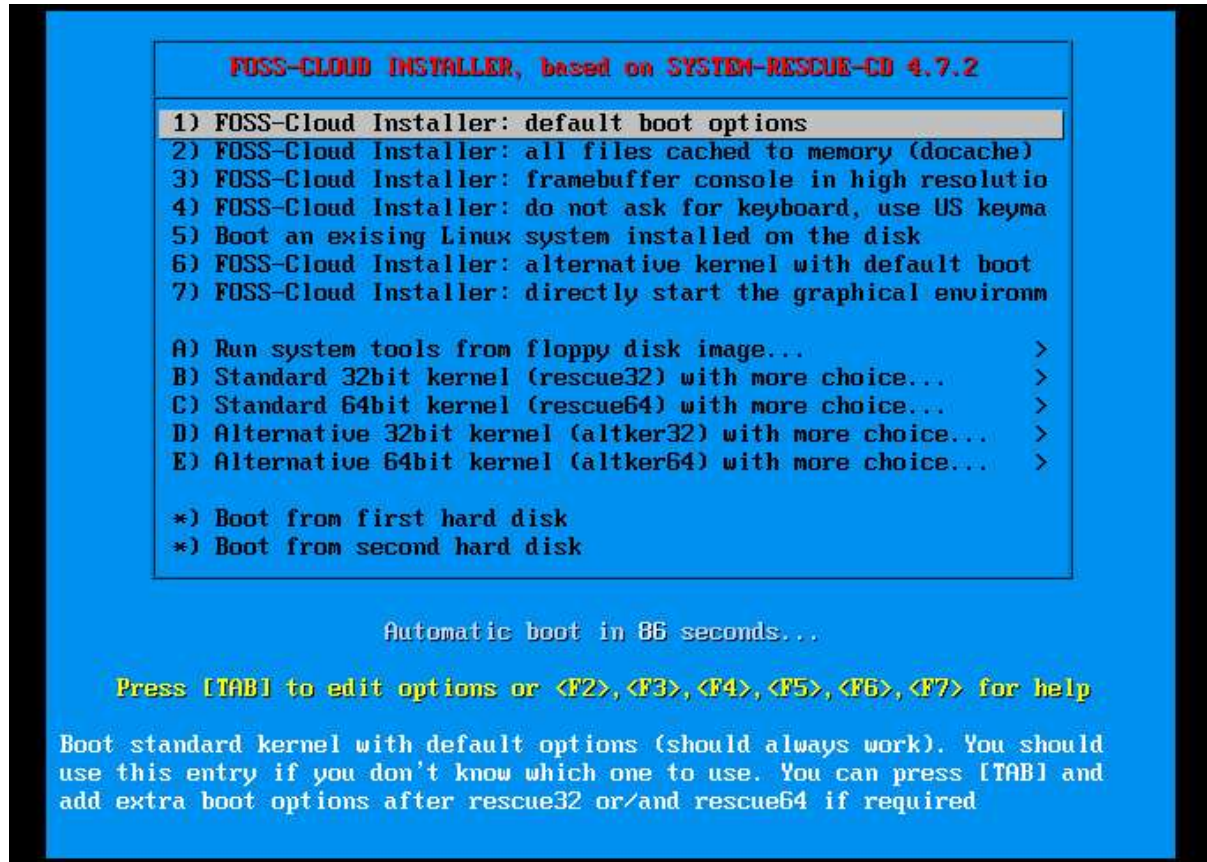

Give memory 8GB

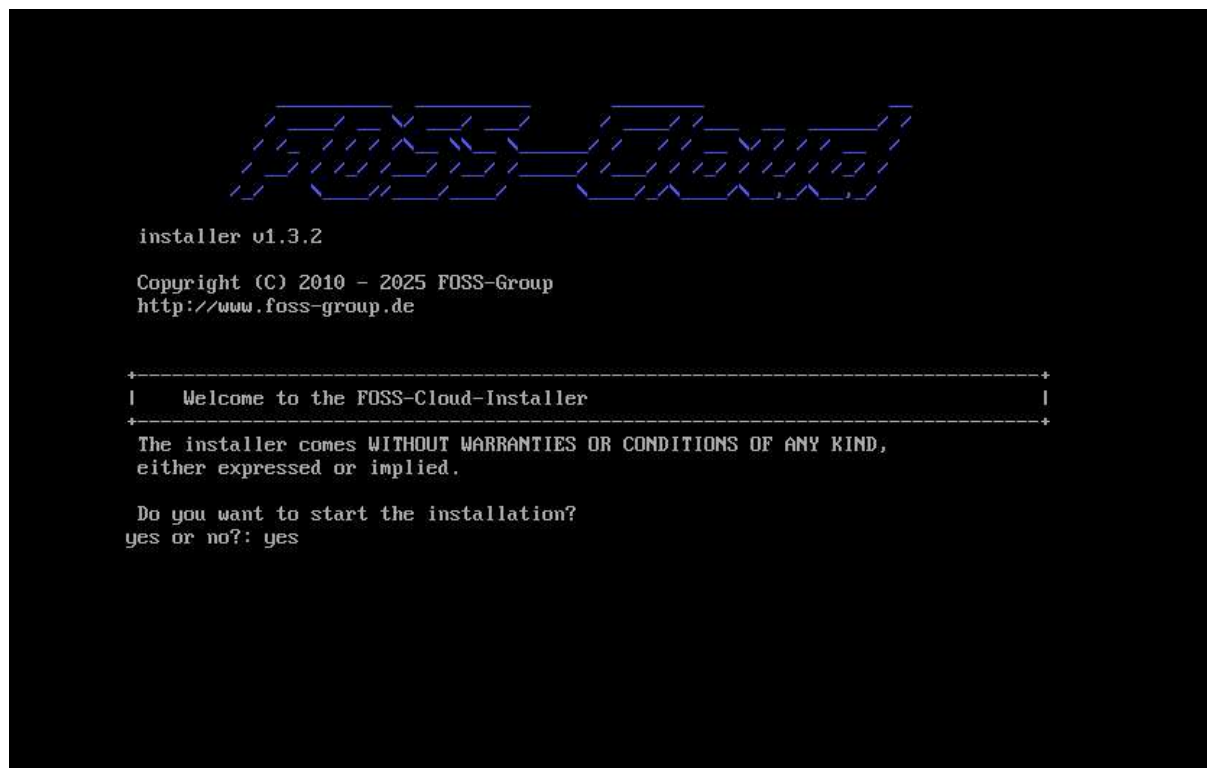

Click on Processors and tick the first option

Now, Click on the power On this virtual machine

click on enter

Choose the demo system , type 1

```
+-----+
|  Node Type Selection  |
+-----+
The Installer supports four different types of servers:

- The Demo-System which lets you quickly install and test the
  FOSS-Cloud on a single machine without any further network
  requirements.

- The Single-Server which runs the whole FOSS-Cloud on
  a single physical server, without any high availability.

- The VM-Node which hosts the virtual machines in a multi node setup
  (requires at least four physical servers).

- The Storage-Node which serves the images of the virtual machines
  in a multi node setup (requires at least four physical servers).

Please enter the number of the server type you would like to install
1) Demo-System
2) Single-Server
3) VM-Node (multi node setup)
4) Storage-Node (multi node setup)
Node type: 1_
```

Choose a Block-device: sda

```
+-----+
|  Installation Device Selection  |
+-----+
A dedicated SCSI, SATA or PATA disk is required for the installation
The disk has to be at least 130 GB in size

Found sda (400 GB). Size is OK

Below you will find a list of all detected and supported disks
sda (400 GB)

Please enter the device name on which you would like to install
Device: sda_
```

Confirm that you want to continue: yes

```
+-----+
|  Installation Device Partitioning  |
+-----+
Below is the existing partition layout of your selected device

Error: /dev/sda: unrecognised disk label
Model: VMware, VMware Virtual S (scsi)
Disk /dev/sda: 429GB
Sector size (logical/physical): 512B/512B
Partition Table: unknown
Disk Flags:

All existing partitions have to be deleted in order to continue
THIS MEANS THAT ALL DATA ON THIS DISK WILL BE LOST
Do you want to continue?
yes or no?: yes
```

Choose the network interface: the available one

```
+-----+
| Network Device Selection |
+-----+

Please enter the device which you would like to use

Available ethernet devices: eno16777736
Device #0: eno16777736_
```

Choose if you want to use automatic network configuration: Yes

```
+-----+
| Network Configuration |
+-----+

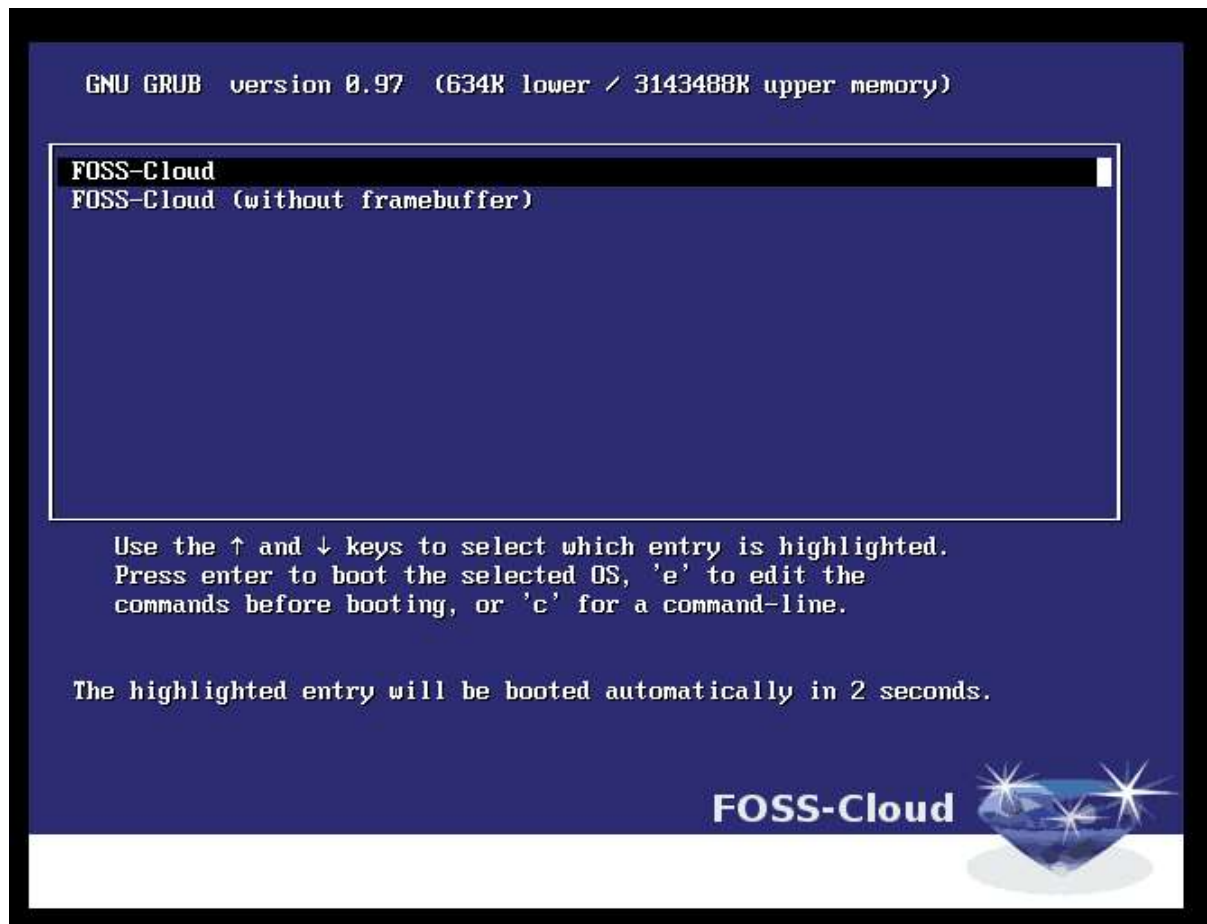

Do you want to use automatic network configuration (via DHCP)?
yes or no?: yes
```

Reboot your system: yes

```
+-----+
| Installation Complete |
+-----+

Congratulation! You have finished the installation of FOSS-Cloud
Now all you need to do is reboot the system and remove the CD-ROM

Do you want to reboot your system?
yes or no?: yes
```
